

BERKSHIRE CORPORATE

CAVERSHAM HOUSE

Case Study

PROJECT OVERVIEW

This property was brought to us prior to being marketed by a local agent whom we have transacted with numerous times.

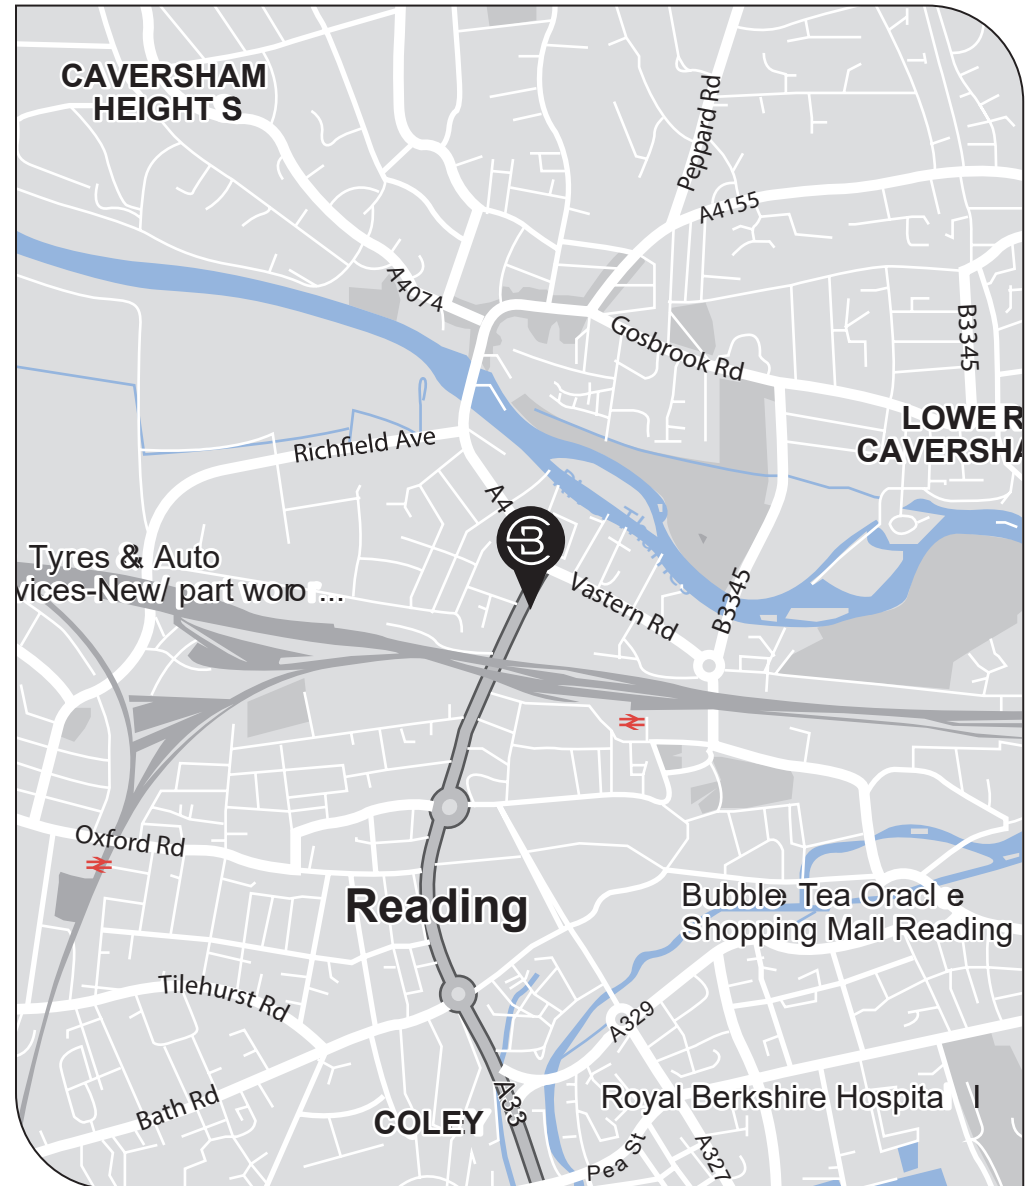

The house, whilst in a poor state of condition throughout, had planning approved for the conversion to 3 apartments. Whilst the property lended itself to be converted this wasn't the end result.

Berkshire Corporate stripped the house back to brick and cleverly remodelled it to create a large 7 bedroom Co-Living House Share. This included a large rear dormer and ground floor extension.

The property has been retained and currently remains fully occupied throughout to professional individual tenants.

Project Type ; Co-Living HMO
Timescale : 9 months
